I am a recent graduate of The Iron Yard in Greenville, SC, where I studied backend development, including Python and Django, with the goal of creating elegant and useful web-based tools.

I'm experienced in backend web development, object-oriented and functional programming, and relational database integration.

I have previously spent more than 15 years working in manufacturing environments as both an engineer and a design manager.
As a result, I have a wealth of knowledge and experience creating products in an organized, thoughtful, and cost-effective manner.

Technical Skills:

Python	Django	HTML/CSS	Wordpress
Java	Heroku	Github	RESTful APIs
Bootstrap	Materialize	PostgreSQL	ZSH

Object Oriented Programming
Functional Programming

Photoshop	Illustrator	InDesign	Acrobat
Solidworks	Rhino3D	AutoCAD	Google Sketchup

Education
